MEASURING AND ORDERING GUIDELINES

1. Determine width of awning (A). This requires a clear span with no obstructions. Be sure light fixtures, down spouts, etc. are not in the way. The awning will require 9 inches of mounting space (B). A minimum of 7 feet - 6 in. (90 inches) is required from the deck or patio to the top of the mounting space (C).
2. Select the projection that best fits your needs (D).
3. Select your fabric choice that best complements your home. Fasteners for mounting on wood are included.

| Quantity | Width (A) | Projection (D) | Frame Color | Manual or Motorized | Fabric Number | Fabric Name | Facing Left or Right Operation* | WeatherGuard™ Cover (Y or N) | Roof Mount Kit (Y or N) |
|----------|-----------|----------------|-------------|---------------------|---------------|-------------|---------------------------------|------------------------------|-------------------------|
| | | | | | | | | | |

! *Operation: Facing the house, specify the side you want the standard crank handle or motor. Outlet is required for motor.
